### REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The closest reference is U.S. Patent 6,022,924 to Akao et al. While Akao discloses a color masterbatch resin composition comprising a mixture of pellets of color masterbatch resin and pellets of a thermoplastic resin, Akao does not disclose the claimed high specific gravity within a range from 1.8 to 3.5 of the color masterbatch pellets and a low specific gravity within a range from 0.5 to 1.6 of the thermoplastic resin. Akao does not disclose the specified equation of a formula (1) in the present claim 1.
2. The search has been updated. New reference Patent 4,786,678 to Dobreski et al discloses a blend of LLDPE in a major amount and a colored second polymer containing  $\text{TiO}_2$  colorant. Other reference to JP 11302390 discloses a colorant masterbatch produced by blending of an olefin-based resin as a carrier ingredient with pigment blended with a second polymer.
3. No prior art has been found to teach or suggest the specified limitations of the high and low gravities of the ingredients characterized by the equation of the formula (1) in the present claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
